Subject: FW: Online Issue Management - Group Strategy

Hi : - by coincidence, see [] note below.

- see [] email to me (attached) from this morning. Our advice has been that any attempt by Shell to edit wik sites about ourselves would result in high-profile criticism of our 'censorship'. However, this is premised on wiki contributors presenting facts, rather than (as per Donovan) openly and admittedly promoting hostile and one-sided views.

We can expect another broadside from Donovan when our History book comes out.

Regards
