REPORT FOR MR. RAY FOX  
OVERVIEW

Dear Mr Fox,

What follows is my report of findings for the Electrodermal Testing I provided for you on Sunday October 12<sup>th</sup>. I would encourage you to verify these readings with conventional laboratory testing and reiterate to you my concern that you seek professional medical attention and diagnostics.

Basically my testing in no particular order showed substantial bioenergetic

1. petrochemical toxicities  
eg lindane-like, aldrite-like, alvite-ike, dia,drex-like, dieldrite-like etc, pesticides/herbicides  
also several unclear patterns not dissimilar to Gulf War Syndrome chemicals
2. substantial liver and kidney imbalances,
3. immune insufficiencies,
4. a plethora of allergic reactions,
5. heavy metal toxicities  
eg lead, mercury, cadmium, nickel
6. fungal overgrowths,
7. parasitic infestions
8. substantial ordotomas problems (teeth,gums roots etc)
9. plethora of viral patterns eg EBV, CMV, Coxsackie etc
10. fatty tissue infiltration
11. digestive insufficiencies
12. adrenal insufficiencies
13. hormonal imbalances
14. lung weakness

If further specifics are required please contact our offices.

I understand you are working with Dr Josef Kees in Germany. Following our conversation recently it appears he understands and verifies what I found through my bioenergetic testing. Let me know when you wish me to send remedies over from the states. Prior to that however, I suggest that Dr Kees send me a list of his support remedies and prognosis etc so that we don't double up on our suggestions.

Best of Health!
